

- ☐ Uses formulaic section headers (e.g. "Summary", "Changes", "Description", "Testing", "Checklist", "Motivation")
- ☐ PR body does not match the repository's own PR template.
- ☐ Mentions of PR being created with the help of AI
- ☐ PR lacks a linked issue number or any reference to prior discussion in the repository. (if applicable)
- ☐ Body (or author comments visible in the PR) describes features, fixes, or motivations that are not supported by the actual diff/files changed.
- ☐ Modifies files that have no clear relationship to the claimed change or any referenced issue.
- ☐ Author's comment responses contain factually incorrect claims that contradict the diff (e.g., describing non-existent changes, referencing functions not in the codebase)
